11. Indicate the item numbers reported herein: Items 2 and 9.

Please be informed that during today's meeting of the Board of Directors of Millennium Global Holdings, Inc. (the "Company"/"MGHI"), the following items were approved:

1. Increase of the authorized capital stock of the Company from P250 Million up to P10 Billion, amending all previous board approvals relating to the matter; and
2. Acquisition of 81% of listed company Calata Corporation ("CAL") by subscribing to 2.5 Billion shares from CAL's increase in authorized capital stock. The Company commits to make necessary disclosures as soon as appropriate.

Post-acquisition, MGHI, using CAL, shall purchase the business of its subsidiary Millennium Ocean Star Corporation "(MOSC") thereby enabling the acquired seafood business to:

(a) use the listed entity in further enhancing its business and fortifying its place as one of the top seafood distributors in the local and international market; and

(b) provide sufficient and underlying value over shares held by existing shareholders.

The entry of MGHI shall be submitted for shareholders' approval during the respective annual stockholders' meetings of the companies.

The founder and driving force behind the success of MOSC is MGHI's Chairman and President, Mr. Michael Yang. Mr. Yang began his career in the seafood business at the age of 15 when his family established the first squid ball production facility in the country. Mr. Yang's foresight and drive for expansion has resulted to MOSC, a leading exporter and importer of seafood and aquaculture products in the local and international market.

The business began in 1981 when Mr. Yang's family migrated to the Philippines and established the first squid ball production facility in Iloilo with a Filipino Chinese partner. In 1987, barely out of his teens, Mr. Yang started exporting squid balls to Hong Kong from their Manila office. He also began the importation of raw materials to supplement their local sources and to cope with the increasing demand for their products. In 1990, Mr. Yang's father established their first Major plant in Cebu City under the name Shie Jie Corporation. This plant exported various seafood products including cuttlefish, squid and other marine products to Taiwan, China, Hong Kong and Korea. It was about this time that Mr. Yang took over the operation of the business from his father, establishing small plants and buying stations all over the Philippines. In 1997, Mr. Yang established Sea Star King as the leading importer of various seafood products from Malaysia, China, Hong Kong, Taiwan and other Asian countries. This would later be known as Food Mark Inc. and eventually as Jomark Food Corporation. Shortly thereafter, a canning factory and seafood processing plant was built in Cavite to house their growing business in Manila. In 2000, MOSC was founded by Mr. Yang as a producer and exporter of high quality, premium, safe frozen seafood and aquaculture products catering to a vast clientele worldwide. In 2006, Mr. Yang established a major plant in Estancia, Iloilo, under the name Asian Ocean Marine to accommodate a greater supply of seafood for their growing clientele. This would later become a major processing plant in the Visayas region.

For export, MOSC's clients include the biggest importers from Japan, Korea, Taiwan, China, Hong Kong, Europe, Canada and The United States all of whom cater to thousands of retail and foodservice customers such as supermarket chains, food distributors, independent grocers, food processors and manufacturers and hotels and restaurants. Other export clients of MOSC come from Puerto Rico, Dominican Republic, France and the West Indies, Germany, Spain, Portugal, Guam, United Kingdom, Italy, Belgium and Sweden. MOSC's local distribution covers the following: Robinsons Supermarkets, S & R Price Club, Makro Philippines, Landmark, Puregold, Big R, Shopwise, SM Supermarket, SM Hypermarket, Hotels, Restaurants and catering events.

MOSC's product list covers almost all known seafood and aquaculture products in the Philippines, sourced from several islands all over the country. MOSC exports an average of 1500 metric tons of Black Tiger Shrimps and 3,000 metric tons of various seafood items annually, including squid, cuttlefish, octopus and coral reef fishes to name a few. It also imports about 2000 metric tons per month of several seafood products like frozen mackerels, fish fillets, giant squid, ilex squid and other various seafood products for local distribution.

Currently, MOSC has major plants strategically located as follows: 11 in Luzon, 7 in Visayas, 3 in Mindanao, and 1 in Hong Kong with several buying stations established around the plants to ensure a consistent supply of fresh raw materials for each plant's large production capacity. The opening of its new state of the art processing and storage facilities, conveniently located within the local and international ports of Manila, assures MOSC's valued clients a consistent supply of fresh premium quality safe seafood and aquaculture products. MOSC is likewise accelerating its seafood business expansion in Vietnam.

Should you have questions, please let us know.
